How do these regular appointments help your child?

- Dental health examinations to provide:
- Thorough examination of their current dental health to catch developing problems early
 - Fluoride treatment to help prevent tooth decay and strengthen their teeth
 - Checking for signs of oral cancer for early detection
 - X-rays, where clinically necessary, for an in-depth examination of their oral health.

We believe this results in the complete package to maintain your child's oral health. We recommend joining to help reduce the risk of expensive restorative treatment in the future.
