

Straight Teeth

Better smiles

Traditional orthodontics might make you think of bulky metal braces, but here at Stoke Bishop Dental Centre we use modern cosmetic appliances. These appliances are designed to be as small and as invisible as possible, whilst still producing beautiful results.

In today's world we live increasingly busy lives and many people are put off standard orthodontic treatment because of the length of treatment time required. We recognise this and so offer a range of short term orthodontic options (if suitable) as well as traditional length orthodontic treatments. These options use both fixed on and removable appliances and are designed to improve your smile in around 6 months or less.

We offer:

Clear Aligners such as Invisalign. These systems work through a series of clear, removable, comfortable aligners that are almost completely invisible. Each aligner is worn for approximately 2–3 weeks, and you will see your teeth gently straighten.

Clear Brackets. These are similar to traditional appliances but the squares attached to the teeth are clear, giving you the benefits of a fixed appliance treatment with much improved aesthetics.

Lingual Appliances. These are a new generation of braces. The braces are placed behind the teeth so no one will ever know that you are wearing them.

Inmann Aligner. This is a removable appliance, which can be used to correct crooked teeth in a manner of weeks. It is fast and affordable and excellent value for money.

Benefits of straight teeth

There are lots of benefits to having straighter teeth:

- Improved attractiveness of your smile. This leads to improved confidence, which in turn can increase your social and career success.
- Improved function of your teeth and jaws. By aligning the teeth, the forces exerted on them when you chew, talk or simply move your teeth are balanced, resulting in better long term health of your teeth, gums and jawbone.
- It is easier to clean straight teeth, reducing the chance of cavities and gum disease.

Contact us on 0117 968 4888 for a free consultation to see what we can do to give you the straight teeth you deserve.
